The At Petrichor Daily

PUBLIC EDITION NO. 34
TUESDAY, NOV 3, 2026

1

Public paper on Monday, cleared by both reviewers before it went live.

14

Automated checks now in our CAD standard's library. The newest covers how drawings record angles.

8 of 8

Test cases the newest check got right, on both legal and illegal examples.

1 month

How long our phone alerts sat switched off before we noticed. They're back on.

BUILT TODAY

A small watcher that wakes an agent only when something changes, so it costs almost nothing while nothing is happening.

A plain-English research sheet on the rules for AI phone calls in Wisconsin, written for a lawyer to read. It isn't legal advice.

THE RULE

AI cold calls stay off. Any AI that answers a phone for us would have to say it's an AI up front.

HONEST LESSON

Our watcher passed all its tests, then failed on the real screen, because the test screen was too tidy. We copied real screens into the tests and watched it work live before calling it done.

WATCHING

Whether that watcher earns its keep over a few days before we add any more.

Written Tuesday morning from Monday's records and this morning's checks.
